SUMMARY

Motivated Computer Science undergraduate specializing in full-stack and real-time application development. Experienced in building scalable systems using Firebase, Node.js, and modern JavaScript. Strong interest in AI-driven solutions and solving real-world problems through efficient, user-focused design.

EDUCATION

SRM University AP, Amaravati	2024 – 2028
B.Tech in Computer Science, CGPA: 8.12/10	
Intermediate	2024
Score: 943/1000	
SSC	2022
Score: 548/600	

TECHNICAL SKILLS

- **Languages:** Python, C++, JavaScript
- **Frontend:** HTML, CSS, Responsive Design
- **Backend & Tools:** Node.js, Firebase, REST APIs, Git, GitHub
- **Databases:** MySQL, Firestore
- **Concepts:** Data Structures, OOP, DBMS, Real-Time Systems

PROJECTS

QuantumCrop AI - Smart Agriculture System

- Developed an AI-based system for crop analysis and agricultural decision-making.
- Applied basic machine learning techniques for crop data analysis and prediction.
- Designed scalable architecture for efficient data processing in a hackathon environment.
- Built as part of a real-world problem-solving hackathon project.

Vital Plasma - Plasma Donor Management Platform

- Developed a full-stack web application to connect plasma donors with recipients.
- Implemented authentication, donor registration, and real-time data handling.
- Built REST APIs using Node.js for managing donor and request data.
- Designed responsive UI for accessibility and user-friendly interaction.

Campus Connect - Real-Time Campus Social Platform

- Developed a real-time campus communication platform using Firebase Authentication and Firestore.
- Implemented anonymous chat, friend chat, and group chat with live synchronization.
- Integrated typing indicators, online presence tracking, and content moderation features.
- Managed real-time data updates using Firestore listeners for multi-user interaction.

CERTIFICATIONS

Azure Fundamentals - Simplilearn (Microsoft Aligned)	2026
Introduction to Programming Using Python - HackerRank	2026
Hackathon Skills & Strategies - Unstop (SRM AP)	2026

EXPERIENCE / ACTIVITIES

- Developed and deployed real-time web applications using Firebase and JavaScript.
- Collaborated in team-based hackathons to build scalable and practical solutions.
- Applied strong problem-solving skills through hands-on project development.

STRENGTHS

Problem Solving, Full-Stack Development, Real-Time Application Design, Team Collaboration
